General Instructions for commercial and open source systems

In order to include the scores on the Speech DF Arena leaderboard on Hugging Face ¹ and facilitate the verification of the system to be submitted, the submitting team has to provide the following artifacts along with a signed declaration:

- Protocol files used to generate the scores for all the evaluation datasets listed on the leaderboard at the time of submission.
- Score files generated using the system to be submitted for all the evaluation datasets listed on the leaderboard at the time of submission.
- Number of parameters used in the system to be submitted

Details regarding the list and URLs / sources used to obtain the evaluation datasets can be found under the "Submit Your System" tab on the leaderboard

Declaration

By signing this form, the submitting team complies with the following conditions:

- The submitted system **has not been trained, directly or indirectly, on the evaluation (test) or development sets** of any dataset with a public license. This includes, but is not limited to, any form of supervised or unsupervised training, fine-tuning, or hyperparameter optimization involving these sets.
- Reported scores correspond to a single **single system** evaluated consistently across the evaluation sets with the same checkpoint and parameters with no modifications in the hyperparameters.
- Commercial systems with a proprietary license agree to grant API access to the DF Arena team if required strictly for verification purposes.
- The DF Arena leaderboard will be updated periodically to include new datasets. The submitting team agrees to evaluate and submit scores on these additional datasets upon if requested in order to maintain a valid presence on the leaderboard.

Submitting team acknowledges that any violation of this declaration may result in disqualification of the submission which includes removal of the system from the leaderboard and public disclosure of the disqualification on DF Arena's official communication channels.
